A Short Hopeful Talk about Climate Change for Senior Primary Students

Green-Schools is delighted to present best-selling and award-winning writer and illustrator Oisín McGann. He was the Irish writer-in-residence for Weather Stations, an EU-funded project where writers from five different countries were tasked with finding ways to use storytelling to raise awareness of climate change.

He is sure to entertain your class with his dramatic and funny explanations of temperature, atmosphere, climate, carbon, and the delicate balance that is the Greenhouse Effect. This talk is suitable for ages 10 to 12 (and maybe a nerdy 9!).
