

The Office of Government Procurement (OGP) has published a Request for Information (RFI) on the provision of Security Services to the Irish Public Sector.

The OGP is seeking feedback from a broad range of firms with an interest in delivering security services to the public sector. This is an opportunity for participants to provide early input into contracting approaches and service delivery models.

The details of this RFI can be found on etenders.gov.ie. The system ID on eTenders is 159887.

The OGP has prepared a short video for suppliers about registering for eTenders and setting up alerts using CPV codes, which can be [accessed at this link](#).
